> A referenced CDE revision and recorded stage do not themselves certify ITP approval. Stages are append-only; full ITP approval, corrections and hold/release rules are separate.

Recorded company acknowledgments — current in-system record

The first authorized reader to confirm for a selected recipient company records that company’s receipt of this specific event. Original notice and cancellation receipts are separate. Visible to all authorized readers of the notice. Not email delivery evidence, a signature, attendance confirmation, technical acceptance or permission to proceed.

No company acknowledgment has been recorded. This does not prove non-delivery or that nobody has read the notice.

Current prerequisite tracking appendix

Current follow-up at export time; not part of the original issued snapshot. All recorded states and full change history are included. Not inspection acceptance, an ITP amendment, a readiness certificate or permission to proceed.

Export prepared at (UTC): 2026-10-20T10:20:33+00:00

Exact ITP stage inherited from the issued notice

All prerequisites and revisions here concern this one recorded stage and ITP revision. Item references remain free text, not structured sub-items or permission to read the source document. This is not ITP approval.
